THE TEST

The same 24 buying-journey questions, in three languages, from three countries, in three AI tools.

Cookware (e-commerce) and electrical & automation components (B2B). Google and ChatGPT run 3 times per test, Perplexity once. A citation is stable when the site appears in at least 2 of 3 runs.

PERPLEXITY · FROM ZURICH · IN GERMAN

75.3% 5.6%

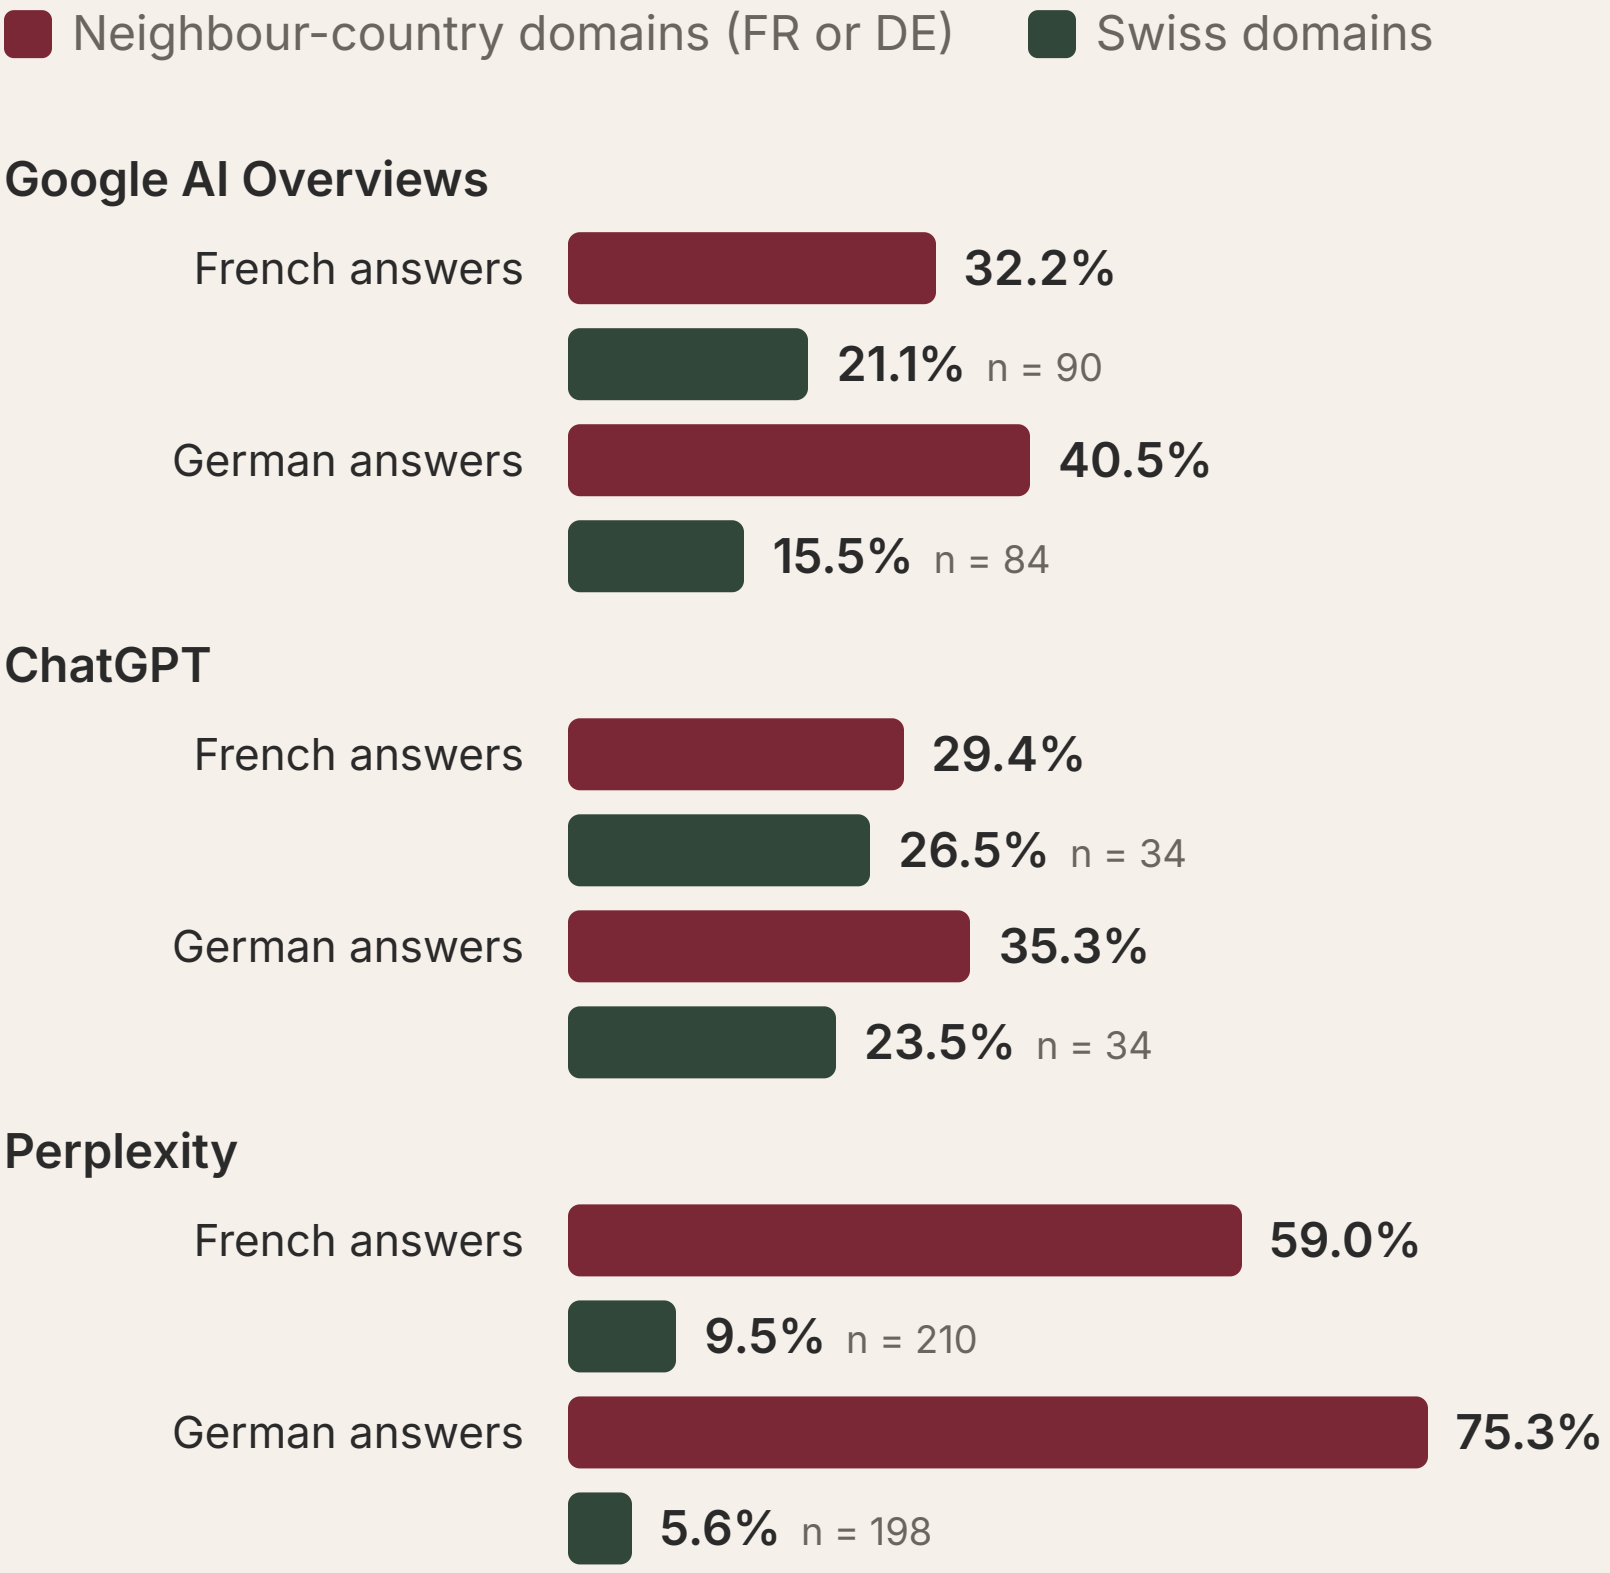

German domains

Swiss domains

In French, the same pattern: 59.0% French domains, 9.5% Swiss ones.

Share of Perplexity's citations in answers obtained from Zurich: 198 in German, 210 in French.

From Zurich, the neighbours get cited more than Swiss sites

Stable citations for Google and ChatGPT, all citations for Perplexity. ChatGPT's Swiss base is small.

TWO MORE SIGNALS

7%

of Perplexity's links to multi-country sites point to the **Swiss version** when the question comes from Zurich (548 links).

+2.7

points of brand mentions for Swiss brands when asked from Zurich: 13.2% against 10.5% from elsewhere (95% interval +1.1 to +5.2).

WHAT IT MEANS FOR YOU

Your benchmark isn't other Swiss brands. It's the brands of Germany and France.

- In German and in French, Swiss answers lean on the neighbours' sources.
- ChatGPT reads the country most, but on a small Swiss base: no plan should rest on it alone.

CHECK ON YOUR SIDE

Is your brand cited in French and in German on a par with the brands of France and Germany?

CROSS-BORDER AI VISIBILITY STUDY 2026

Find your own situation in the study

Seven findings, the full grid by tool, country, language and sector, and the report in English and French.
